[no. 4] p. 537-557.

DESCRIPTORS: *Heat transfer, *Analog systems,
Analog computers, Differential equations, *Mathematical
models, Electrical networks, Temperature, Electric
potential, Electric currents, Mathematical analysis.

The article outlines various techniques for analog rep-
resentation of heat transfer phenomena. The examples
most often found in the literature deal mainly with
steady-state and transient heat transfer by conduction.
The two pertinent techniques--continuous conductors
and resistance networks--each have their place in these
